SAUGET - Sanitary Landfill  
Monsanto Company

TO: Messrs. D. B. Morton and Otto S. Hallden

FROM: Ernest C. Bennett

DATE: May 26, 1967

Attached is a report from Monsanto Company on analyses of test wells at the sanitary landfill in Sauget used by the Monsanto Company for disposal of chemical waste.

This report was requested following a discussion with General Sanitation some time ago as to jurisdiction of this landfill. My understanding is that Paul Sauget (mayor's son) applied for a license to operate two sanitary landfills adjacent to one another. The one landfill receives general refuse; the second receives only industrial waste from Monsanto Company. The latter is the landfill for which this report applies.

The West Central Regional Office Staff and myself are uncertain as to whether this matter should be handled by the Bureau of General Sanitation or the Bureau of Stream Pollution Control. This landfill is being used for Monsanto Company industrial process waste. It does not receive waste from other sources, nor from the waste treatment plant.

  
Ernest C. Bennett  
Sanitary Engineer
